
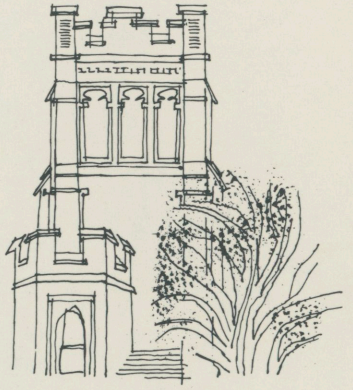
You and your College Education

You and your College Education

Like thousands of other high school Juniors and Seniors, you are probably in the process of selecting a college or university where you will continue your education for another four years. You have probably decided that it will not be an easy task to choose between a large university and a small college; between a non-denominational and a church-related college; or between a broad, general education and a specialized, technological education. This booklet attempts to answer some pertinent questions about college and to help you make decisions which will affect your entire life. The latter pages of the booklet contain information about Lake Forest College, including admission requirements, cost, courses of instruction, social life, athletics, and personal guidance.



Lake Forest College

Why go to College?

THERE ARE MANY REASONS why a young person such as you should go on to college. In order to lead a useful and purposeful life, it is important for you to learn as much as possible about the world in which we live. College provides the environment and opportunities for such learning. A college education can broaden your outlook on life, can make you more tolerant of other persons and new ideas and can enrich your life in countless other ways.

The ability to think clearly distinguishes the superior from the mediocre man. College stimulates the capacity to think and provides a store of knowledge. It is the beginning of a life process, not a stamped and delivered product. Adapted to that stage of maturity when students are emerging from directed activity to full self-control, it develops well-balanced men and women—open-minded but not swept off their feet by every new current of thought; loyal to the past but not in bondage to the past. The ability to meet a new situation adequately is the acid test of the educated man.

You may ask if higher education is worth what it costs. Here are some interesting statistics on this question from the U.S. Bureau of the Census:

Average *elementary school* graduate in a lifetime will earn.....$116,000

Average *high school* graduate in a lifetime will earn.....$165,000

Average *college* graduate in a lifetime will earn.....$268,000

These figures indicate that the average college graduate, in his lifetime, will earn $100,000 more than the man who did not attend college. A college education will cost you from $6,000 to $9,000—compare it with the returns!

Who should go to College?

A COLLEGE EDUCATION is not always necessary for success, happiness, and security. There are many successful businessmen and industrial leaders in this country who did not finish high school; yet they are happy and financially secure in their jobs. As a prospective college student, you should seriously ask yourself the following questions:

1. Am I really interested in academic work?—A large number of students fail in college each year because they are not suited for academic pursuits and they cannot adapt themselves to college life. Many of these students entered college because of family pressure, others to avoid military service or to delay the inevitable day when they would have to go to work to support themselves. Some veterans enter college because they believe the federal government owes them an education. College admissions officers try to dissuade these people from entering college, but often their attempts are unrewarded. On the other hand, there are thousands of high school graduates each year who should be encouraged to go to college. These young people have the intelligence, maturity, and ambition to profit greatly from higher education. Those coming from families of modest means will find that

most colleges are able to offer them financial assistance in the form of scholarships or grants.

2. Do I have a high school record which will qualify me for entrance to the college of my choice?

3. Is my reading ability adequate?

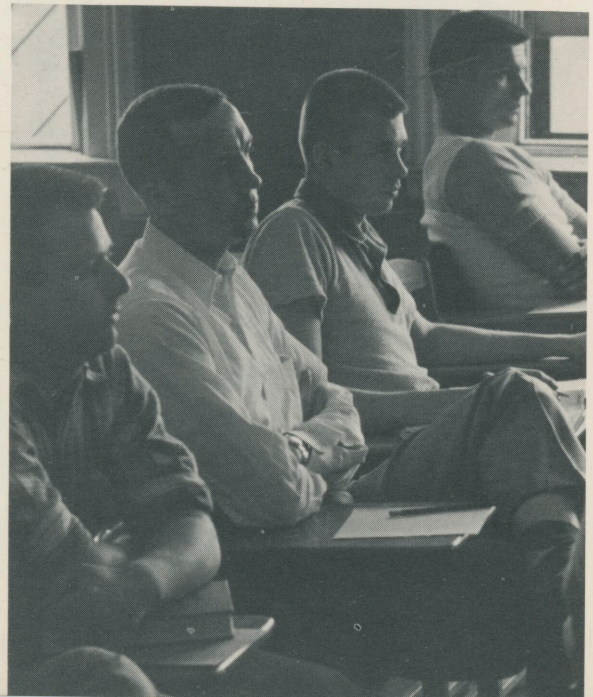
4. Do I have the intelligence to undertake academic work at the college level?

5. Do I possess the ambition, industry, and self-reliance to profit from four years of advanced education?

6. Does the occupation which I have tentatively chosen require academic training at the college level? Some of the professions which require such training are: law, medicine, dentistry, medical technology, ministry, engineering, biology, chemistry, physics, psychology, social work, foreign service, and teaching. Many positions in business, industry, and government also require college training.

Ponder these questions carefully and seriously, then proceed with your plans for the future.

How to select a College



AFTER RECEIVING CATALOGS, picture books, and other information from several colleges and universities, you should try to narrow your choice to two or three colleges which appear to have the type of academic program, campus life, location, faculty, and student body which you are seeking. Some students prefer a large university with modern buildings and equipment, extensive fraternity and sorority social life, "big-time" athletic teams and a continuous round of activities. But a winning football team and an impressive sorority house do not guarantee you a sound education! Other students will prefer the friendly atmosphere and the personalized instruction which is found on a small college campus. The social pace may be slower, the buildings may be older, the football team may have a losing season, but somehow these students have a feeling of belonging and an inner sense of security that they might not have at a university of several thousand students. They find it easier to study and easier to make friends; and it *is* pleasant to have professors who remember your name.

You should learn as much as possible about the schools you are considering, including the admission requirements, cost, financial aid available (if necessary), counseling and guidance available, buildings and facilities, student recreational and social activities, campus location, religious affiliation, and most important, the quality of the faculty and the courses of instruction available.

You and your parents should plan to visit several colleges before making a final decision. The first-hand information gained by such a personal visit is of vital importance. Before making your visit, however, advise the Admissions Office of your plans so that your visit will be most profitable. It is advisable to look over a campus while the college is in session provided the proper arrangements for leaving school can be made with your principal or counselor. If possible, become acquainted with one or more successful students already enrolled at the college and ask for their opinions. Also listen to the opinions of your parents and friends; take everything into consideration, BUT MAKE THE DECISION YOURSELF.

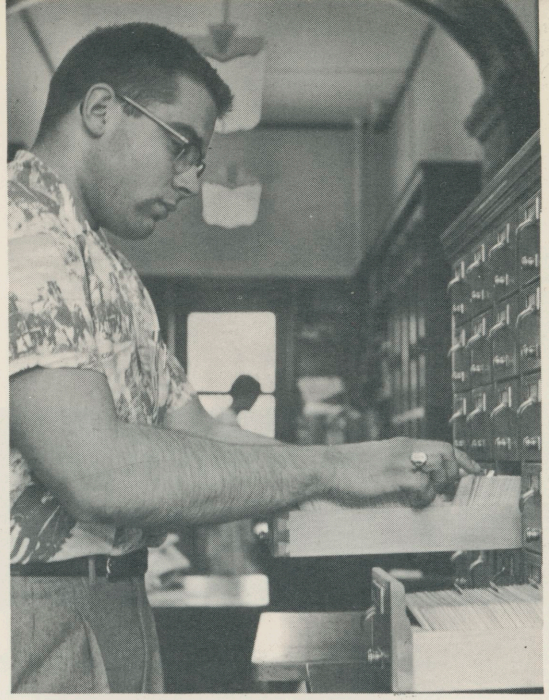
Why choose a Liberal Arts College?

FOR MORE THAN 300 YEARS, the liberal arts college has been one of the most distinctive of American institutions. It has expressed in each community the American passion for education. Long and intimate association with the forces and ideals that are fundamental in national life entitles the liberal arts college to most thoughtful consideration in this day of seriously diluted American ideals.

The liberal arts college selects, stimulates and trains prospective scholars. Without claiming a monopoly on scholarship, it makes this a primary objective. Love for truth, an open mind in the search for facts, an earnest desire to harmonize the old and the new, are its marks.

Narrowing grooves of specialization require corresponding emphasis on the breadth of culture if democracy is to succeed. Cultural education prepares students for a richer life—a quickened interest in truth, finer appreciation of the achievements of the past, a more tolerant attitude toward other men and other races, a deeper responsibility for community welfare and the highest development of self in the service of society.

We live in a physical world governed by scientific laws; therefore a student in a liberal arts college should become acquainted with one or more sciences. We also



live in a world populated by many peoples; therefore the student should take courses in history, economics, political science, sociology, and other social studies. We must communicate with each other; therefore the student should study English, modern languages, art, music, and other media of expression. The student should take work in each of these three areas before specializing in one of them.

Liberal arts training is centered about the student and teaching rather than about subject matter and research. A college is *not* a university. A university contains several schools or colleges on its campus and a college of liberal arts is normally included within this group of schools. The university is designed primarily to offer the student highly specialized training and research opportunities in a particular academic area. It undertakes to contribute systematically to the sum total of human knowledge through research and experimentation. The liberal arts college, on the other hand, provides a broad, general education covering many different fields of study. The college encourages its faculty in the search for new truth through scholarship and research, but its main function is to teach. Through this close and intimate association with great teachers, intellectual and spiritual values are enhanced.

Why choose Lake Forest College?

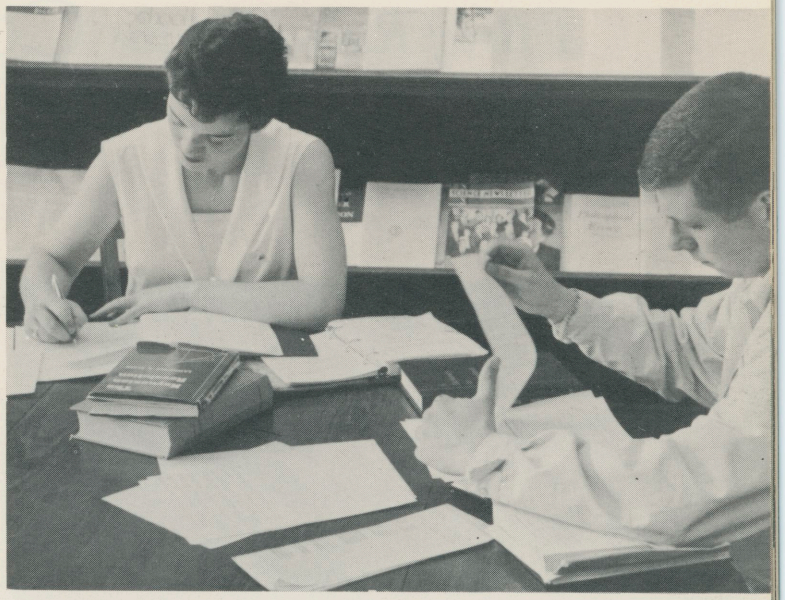
FIRST OF ALL, Lake Forest College is a Christian college. Character building through education is the main objective of a Christian college. It reenforces education at the weakest point. Born of the Christian impulse and associated with the Presbyterian church, Lake Forest College seeks its highest expression today in a religious environment for its students. It offers a unified approach to life problems.

As a college of liberal arts, Lake Forest College has as its primary purpose that of providing competent instruction in the various disciplines of the arts and sciences, of developing and maintaining a wholesome atmosphere conducive to the growth of good character and high scholarship, and of preparing its students for intelligent and sensitive living. Since Lake Forest is a privately-supported, independent college and is free from political interference, it can devote itself exclusively and whole-heartedly to this purpose. The College believes that a broad education in the liberal arts and sciences provides a sound foundation for the future.

Believing that a well-trained faculty is the heart of a college, Lake Forest retains professional teachers who are experienced and understanding. These faculty members have had many different and interesting teaching and educational experiences, and a large majority of them hold the degree of Doctor of Philosophy. They come from leading universities of the United States and of Europe. Their cosmopolitan backgrounds help provide a richer and broader educational experience for the students at Lake Forest College.

The College is coeducational and believes very strongly in personalized instruction. For that reason the enrollment is limited, permitting classes of smaller size. Seldom does the enrollment in a class exceed twenty-five students. The 1956–57 day enrollment is 800. Of this number, 60 per cent are men and 40 per cent are women. These students come from twenty-eight states and six foreign countries. Their individual backgrounds add much to the color and vitality of Lake Forest campus life. It is the intention of the College Trustees that the enrollment in the future will not exceed 1,000 students.

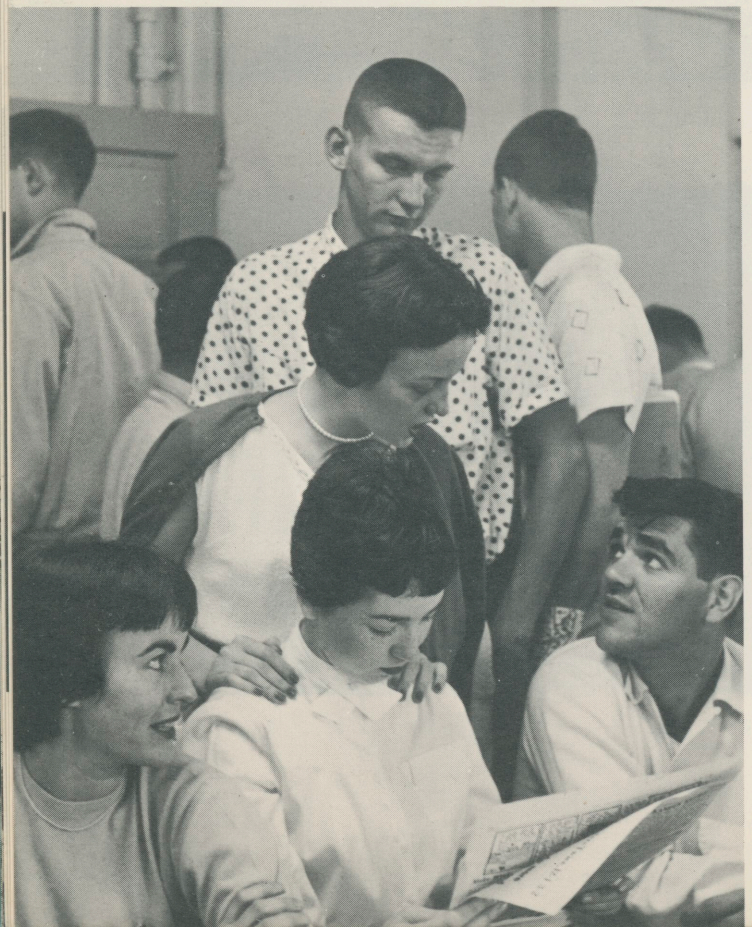
The College campus, consisting of ninety-three acres of wooded land near the shores of Lake Michigan, is located in a beautiful residential suburb about thirty miles north of the Chicago "loop". It is easily accessible to the many educational and cultural facilities of that city. The College buildings include nine residence halls for men and women, four classroom buildings, a College Commons, where resident men and women dine together, a library, a chapel, a field house, a women's gymnasium, and a student center with coffee shop, lounge, and recreation rooms. There are athletic fields and facilities for football, basketball, baseball, tennis, golf, track, badminton, volleyball, hockey, archery, and wrestling. The residence halls at Lake Forest are particularly noted for their friendly and gracious atmosphere. The rooms and lounges are furnished with modern or colonial furniture. No more than two students are permitted in a room and some single rooms are available. In short, the campus provides a physical environment which can make your college career an interesting, rewarding, and enjoyable experience.



A Brief Resumé of the Courses of Instruction

"Men are men before they are lawyers or physicians or manufacturers; and if you make them capable and sensible men, they will make themselves capable and sensible lawyers or physicians."

—JOHN STUART MILL



LAKE FOREST'S PROGRAM OF STUDY is that of the liberal arts and science college. It offers practical, well-rounded preparation in a wide range of academic areas.

The education received at Lake Forest College has made it possible for many graduates to earn responsible positions in the following fields:

Business Administration
Law and Government Service
Scientific professions, including Engineering
Medicine, Dentistry, Nursing, and Medical Technology
Teaching
Ministry and Social Service
Art, Dramatics, Music, Writing

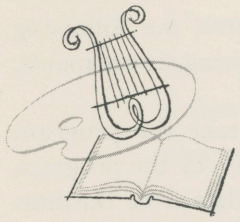
You as a student study for one of the following degrees at the College: Bachelor of Arts, Bachelor of Arts in Business Administration, or Bachelor of Science in Medical Technology. If you are not certain which program you wish to follow, or in which area you wish to major, your first two years of study will provide a broad base for later judgment.

Here is a sample freshman and sophomore program, but bear in mind that it may differ slightly for some students:

Freshman Year	Sophomore Year
English Composition	World Literature
Social Science	Foreign Language (or Elective)
Foreign Language or Mathematics	Laboratory Science
Elective in Major Field	Art or Music and Elective
Art or Music and Elective	Elective in Major Field

You will note that you normally have an elective in the freshman and the sophomore year. This means that you choose a course from the field in which you plan to concentrate. The choice may be made from those listed on the next page.

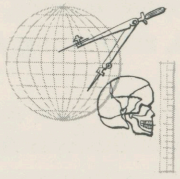
The Humanities



the fundamental things of man's heritage as expressed in . . .

Art
English
Latin
Modern Languages
Music
Philosophy and Religion
Speech and Dramatics

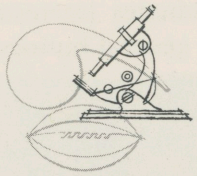
The Social Sciences



the understanding of men's relations with one another, as revealed through the study of . . .

American Civilization
Economics and Business Administration
Education
Geography
History
Political Science
Sociology and Anthropology

The Natural Sciences



the nature of living things and of natural forces as seen and mastered through the disciplines of . . .

Astronomy
Biology
Chemistry
Mathematics
Physical Education
Physics
Psychology

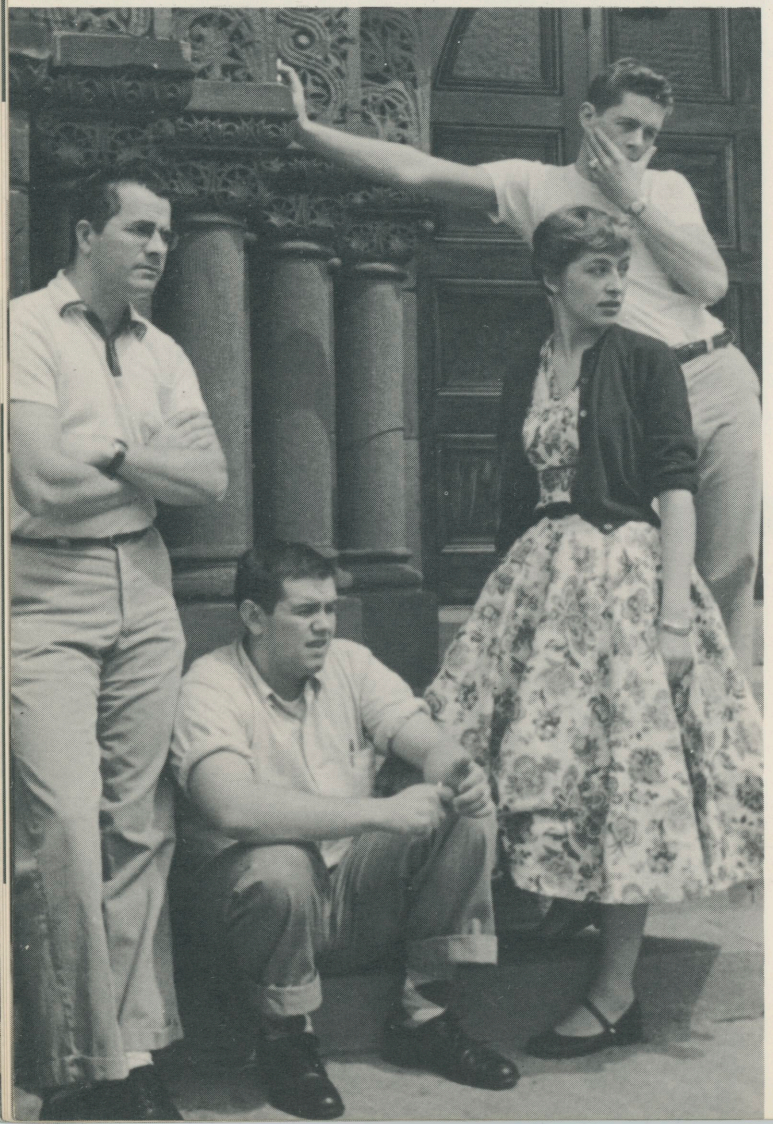
Courses in secretarial training are also available.

Your junior and senior years will consist largely of studies in your major field and in areas related to this major, with added courses in religion and science during your junior year, and a course in history of modern thought in your senior year.

The following pages describe briefly some of these fields in showing how they relate to various careers.

Preparing at Lake Forest College for a career in

Business



NUMEROUS BUSINESS EXECUTIVES in Chicago and the Middle West received their college training at Lake Forest. Included are men who are presidents and vice-presidents of various firms, as well as those who head departments or are in management training programs.

Graduates interested in business have entered, among others, the following fields: general business administration, accounting, sales, advertising, investments, insurance.

If you are interested in a business career, you may wish to take the program leading to a degree of Bachelor of Arts in Business Administration, or the program leading to the degree of Bachelor of Arts with a major in some other area. Business and industry look to liberal arts colleges for new personnel. Some firms prefer graduates who have had a major in business; others do not so specify.

If you elect to major in Economics and Business Administration, some of the courses beyond the generally required freshman and sophomore years include:

Introduction to Economics
Theory of Income and Employment
Money and Banking
Labor Problems
Government and Business
Introduction to Statistics
Government Finance
Accounting
Business Law
Cost Accounting
Federal Income Taxes
Marketing
Case Problems in Finance
Business Management
Monetary Theory
Comparative Economic Systems
General Finance
Auditing
Seminar in Economics
Seminar in Business

Preparing at Lake Forest College for a career in

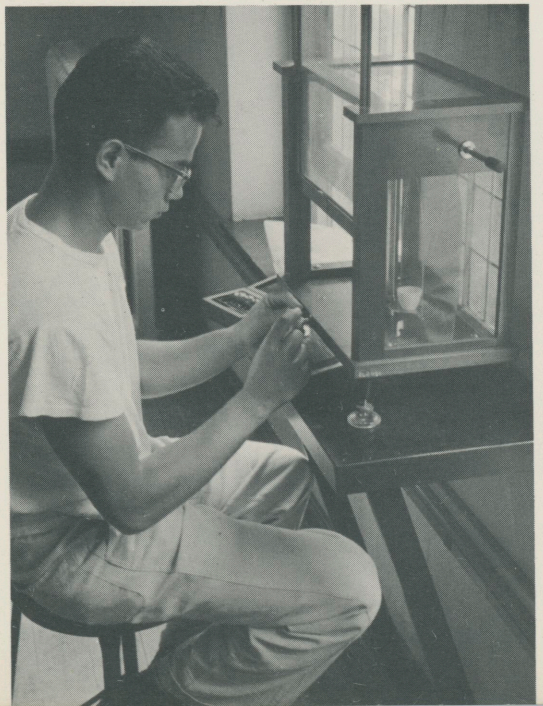
Science
or
Engineering

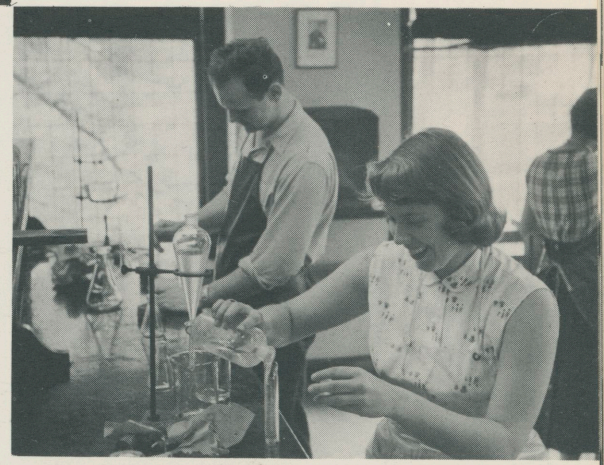
THE GREATEST PROPORTION of distinguished scientists listed in "American Men of Science" had their early college training in a college of arts and sciences like Lake Forest, before entering professional school for further study.

As a science student, you would major in one of the following: biology, chemistry, mathematics, physics, or psychology. At Lake Forest College you also have the advantage of field trips to nearby science laboratories of industrial plants: Abbott Laboratories (drugs and pharmaceuticals), American Steel and Wire Corporation, Cyclone Fence, Fansteel Metallurgical Corporation, Johnson Motors, Johns-Manville Corporation, and others.

If you are interested in engineering, Lake Forest College has a combined program with the Illinois Institute of Technology, Chicago. The course consists of three years of work at Lake Forest and two years in the engineering school. After you complete the work at the engineering school a Bachelor of Arts degree is conferred by Lake Forest College and a Bachelor of Science degree in Engineering is conferred by Illinois Institute of Technology. The same plan may be possible with other engineering schools with special arrangement through the Dean's office.

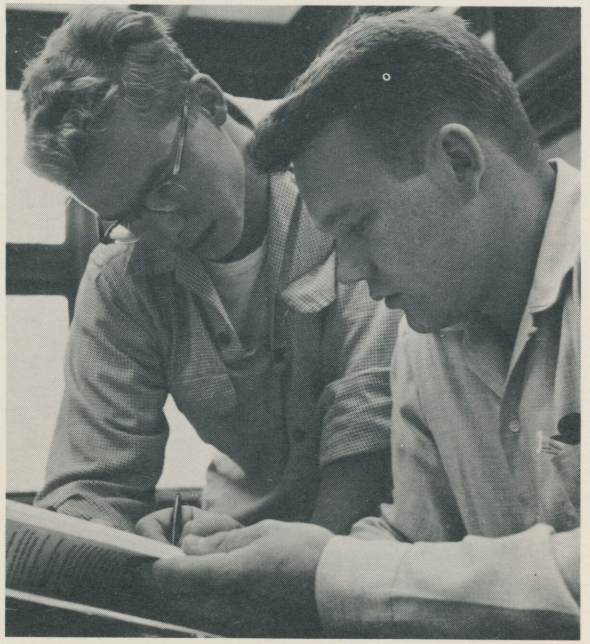
A complete outline of the integrated engineering program is available in a separate folder and may be obtained through the Admissions Office of the College.





Preparing at Lake Forest College for

Law *or* Government Service



LAKE FOREST COLLEGE graduates may be found at all levels of government service —federal, state, and local. Some of these are in the U. S. Foreign Service, others are administrators of various government agencies, judges, legislators, or other government officials.

Others are in private law practice, or are in legal work for corporations and public agencies.

Many of these majored in political science at Lake Forest, before entering a school of law or government. Others majored in one of the other liberal arts studies. A major in American Civilization is a logical choice.

If you elect a major in American Civilization, your studies include, beyond the required general education courses in the freshman and sophomore years, selections from the following:

American Federal and State Government
Introduction to Economics
American History
American Literature
Political Parties
English History
International Relations
Modern Drama
Modern Novel
Problems of American Labor
English Literature
American Public School System
History of Political Ideas
History of Economic Thought
Twentieth Century America
Seminar in American History
Seminar in American Literature
And others

Preparing at Lake Forest College for a career in Medicine Dentistry Nursing *or* Medical Technology

IN ANY ONE OF THESE PROGRAMS you would probably major in chemistry or biology and take related work in other sciences. Provided the proper prerequisites are included in the course of study, a major in any area is possible.

In certain cases, a student who is admitted to a college of medicine or dentistry after the end of his junior year at Lake Forest may transfer back the work of one year from the professional school toward the Bachelor of Arts degree at Lake Forest. This shortens the entire liberal arts professional training program by one year. The degree is awarded at the same time as the professional degree.

If you are interested in medical technology, there is a special program at Lake Forest in cooperation with the School of Medical Technology of Children's Memorial Hospital of Chicago. Students interested in any one of these areas should request a college catalogue for further details.

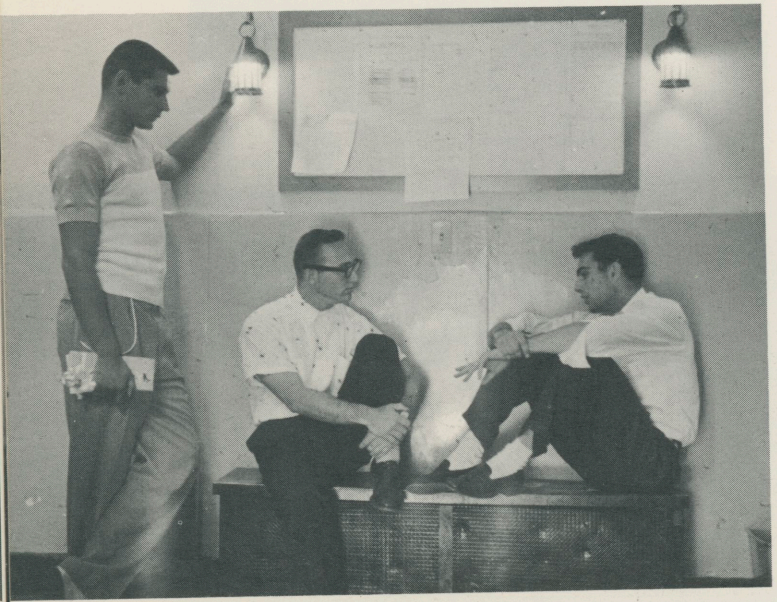
Preparing at Lake Forest College for a career in

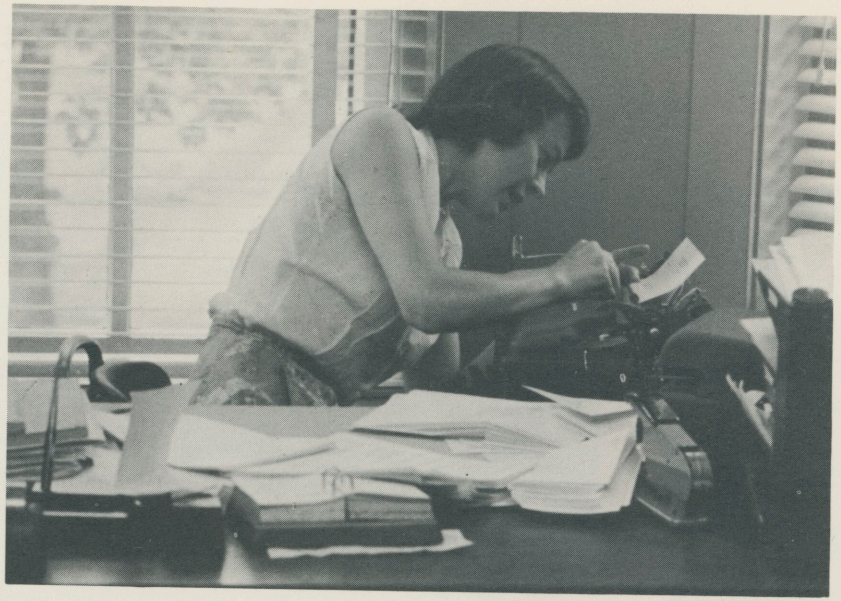
Teaching

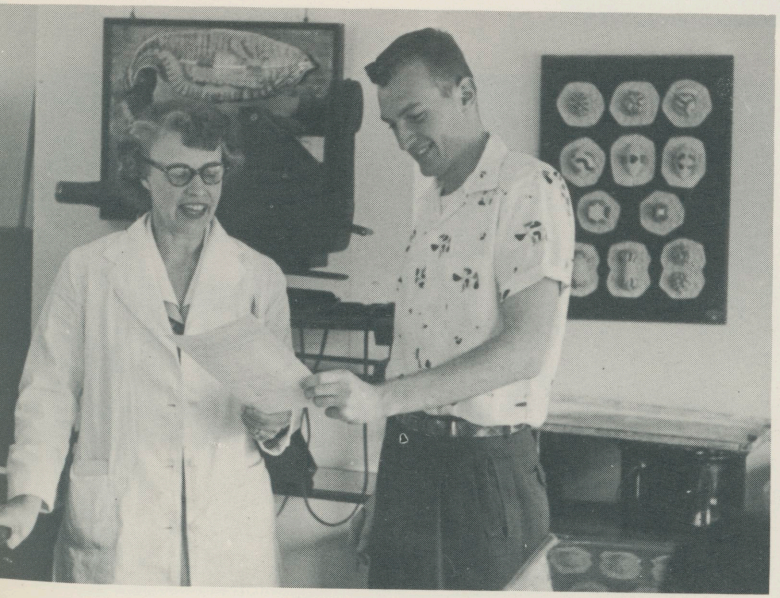
A CONSIDERABLE NUMBER of Lake Forest graduates enter upon teaching careers. Lake Forest College is fully equipped to train both secondary and elementary school teachers, and it welcomes applications from prospective teachers.

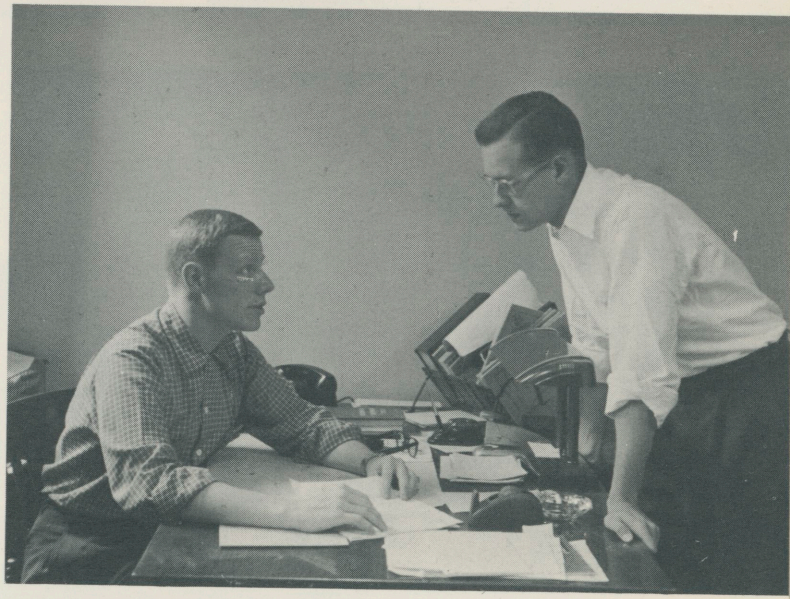
If you plan to teach in secondary school, you would major in the subject you expect to teach (such as English, history, mathematics, biology). If you plan to teach in elementary school, you would major in any of the departments of the College listed on page 13.

If you plan to teach in college, you would take the Bachelor of Arts program with a major in the field of your interest. Upon graduation, you may then take further study leading to advanced degrees at a graduate school.









Preparing at Lake Forest College for a career in

Art
Dramatics
Music *or*
Writing

A NUMBER of Lake Forest graduates have been successful in these fields, both as performers and as teachers. Among performers are several well-known motion picture and television stars, as well as television writers and producers.

In addition to departmental courses in drawing, painting, sculpture, public speaking, stagecraft, acting, radio, applied music in voice and in various instruments, and studies in English composition and literature, there are various extracurricular activities through which students in these fields may express themselves: student art shows, student theater and television productions, student musical concerts, and student publications. These are described on pages 26 and 27.

THOMAS
STRAUSS
GOUNOD
SCHUBERT
BACH
WAGNER

Preparing at Lake Forest College for the

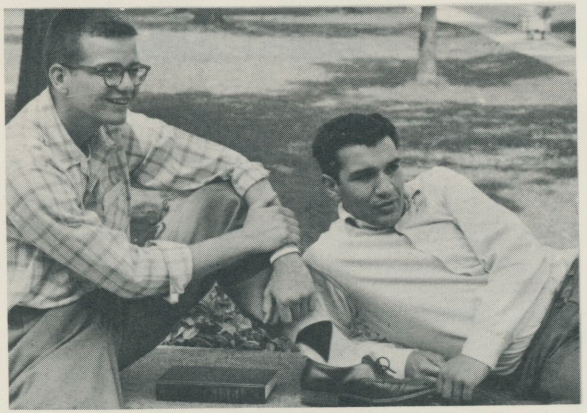
Ministry

or for

Social Service

CAREERS IN THE MINISTRY include not only pastorates, but also posts as chaplains at industrial plants and in military service, and as directors of Christian education at churches and schools. Your major study could be in any of the departments of the College. Approximately twenty different courses are offered in the Department of Religion and Philosophy. Normally you would plan to enter professional school or seminary after receiving your Bachelor of Arts degree from Lake Forest.

If you are interested in social service, such as working for one of the many agencies designed to help people, you would normally major in psychology or sociology or in one of the many fields in the division of the social sciences.



Outside the Class Room at Lake Forest

Guidance and Counseling

ANOTHER IMPORTANT SERVICE TO THE STUDENT is friendly guidance and counseling that helps to integrate the academic, social, recreational, and spiritual life on the campus. At Lake Forest, every student is assigned a faculty counselor who is sincerely interested in the welfare and growth of the individual student.

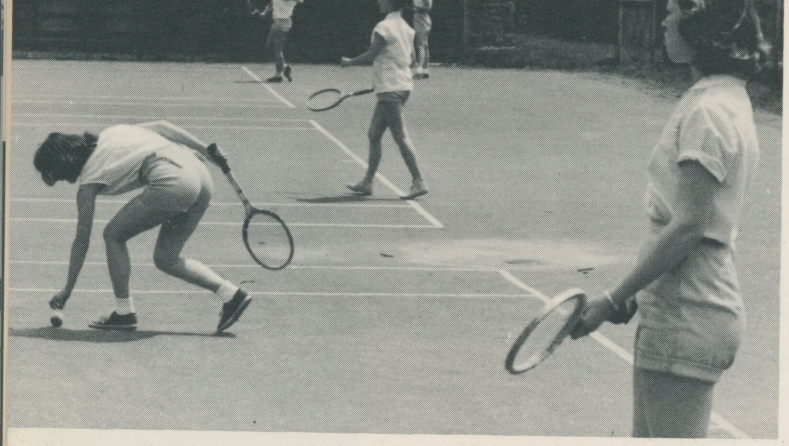
A continuous orientation program for freshmen is carried on at Lake Forest throughout the entire academic year. When a freshman student arrives on the campus for the first time, he discusses his program of courses with the Dean of Students or the Assistant Dean of Students. One of these serves as his official adviser for his first year. At the close of the year, he is assigned to a faculty member who will serve as his adviser. The faculty adviser aids the student in selecting his courses, approves the final selection, and counsels with him from time to time concerning his academic achievement and other matters which the student chooses to bring to him. The Dean of Students, the Assistant Dean of Students, the Chaplain, and the Dean of the College are always available for counseling at times convenient for the student. Resident students also have dormitory head residents and student counselors to whom they may go.

Student Government

The Student Association, to which all students automatically belong, is organized to consider matters of general student concern. It functions through its governing board, the Student Congress. The Student Congress consists of the president of the congress and one representative elected by each recognized social group (fraternity, sorority, independent). The representative must have had at least forty-five hours of academic work by the end of the semester preceding his election and must be in good standing.

Athletics

Keen competition with colleges throughout the Middle West is provided in Lake Forest's varsity athletic program, which involves football, basketball, baseball, track, tennis, golf, and wrestling. Lake Forest's athletic fields and facilities are of the highest standard and the athletic coaches are whole-heartedly interested



in developing good sportsmanship, character, morale, and group spirit. Intercollegiate sports are so organized that any male student who is scholastically eligible may try out for a team. Lake Forest is a member of the College Conference of Illinois. Other members of this conference are Augustana, Carroll, Elmhurst, Illinois Wesleyan, James Millikin, North Central, and Wheaton. Athletic contests are also scheduled with such colleges as Beloit, De Pauw, Wabash, Carleton, and Swarthmore.

Every male student may participate in Lake Forest's intramural athletic program, which offers touch football, basketball, volleyball, softball, tennis, bowling, badminton, golf, and other sports in which interest is shown. Faculty teams often compete with student teams in such sports as bowling, volleyball, and ping pong, and add much to the excitement and friendly rivalry of the intramural contests.

A broad program of intramural sports and activities is also offered for women through the sponsorship of the Women's Athletic Association. Activities included in this program are golf, field hockey, horseback riding, volleyball, basketball, bowling, softball, ping pong, badminton, tennis, and others.

Social Organizations

The five fraternities on the campus are Delta Chi, Kappa Sigma, Phi Delta Theta, Phi Pi Epsilon and Tau Kappa Epsilon. The five sororities are Alpha Delta Pi, Alpha Phi, Alpha Xi Delta, Chi Omega and Gamma Phi Beta. An Independent Men's Club and an Independent Women's Club are also active on the campus. The fraternities have living quarters and chapter rooms in Blackstone and Harlan Halls, and Blackstone Annex, while the sororities and Independent Women's Club are provided with chapter rooms in Lois Durand Hall. The Independent Men's Club is housed in Harlan Annex. The Pan-Hellenic Association and the Inter-Fraternity Council enforce regulations and deal with problems common to all fraternal organizations.

Special Interest Clubs

A number of special interest clubs are active on campus. These are: Alpha Psi Omega (national honorary in dramatics), Beta Beta Beta (national honorary in biology), the College Christian Community, the Economics Club, the Garrick Players, the Lettermen's Club, Phi Sigma Iota (national honorary in romance languages), Pi Alpha Chi (honorary in music), Psychology Club, Sigma Pi Sigma (national honorary in physics), Sociology Club, Student Affiliates of the American Chemical Society, and the Women's Athletic Association.

Music

The Department of Music has much to offer Lake Forest students. In addition to an excellent variety of courses in applied music, in theory, and in music education, interested students are eligible to try out for the choir, men's chorus, madrigal singers, and band. Concerts by professional musicians are presented and music students give recitals throughout the year. The Department sponsors a national honorary music society, Pi Alpha Chi.

Debate and Oratory

Debate and oratory enlist the interest of many students. Intercollegiate debate teams for men and women are organized under the supervision of the Department of Speech. Freshmen are eligible for both the freshman and varsity teams. Intercollegiate debates are held on subjects of timely interest selected by the National Speech Association. Lake Forest's teams are invited to national and regional debate tournaments.

Publications

The publications of the student body are edited and managed by students. The STENTOR, the college newspaper, is published weekly and is the voice of the faculty and student body. The FORESTER, published annually in the fall, is the College yearbook. It becomes a cherished possession of each Lake Forester. TUSITALA is the College literary magazine which is published periodically. All students interested in any phase of writing, editing, reporting, or photography are invited to work on these publications.

Religious Activities

The College Christian Community is an organization whose membership includes any member of the student body, faculty, administration and staff, who expresses his concern that the Christian way of life shall be carried forward in his personal and vocational life, and in all aspects of the College's campus life. The purpose of this organization is to provide the opportunity for all members of the College community to unite in Christian fellowship through study, worship, service, and recreation. Its members strive for a deeper understanding of the Christian faith and a greater fulfillment of their obligations as Christians on the College campus and in all walks of life.

The Religious Activities Committee, composed of students and faculty members, coordinates all the religious activities of the College. The members participate in the planning of College chapel programs, help in carrying out these programs, and receive and consider suggestions for furthering the religious life of the campus.

Dramatics

The Garrick Players, one of the outstanding amateur dramatic groups in the Middle West, each year sponsors four major productions, and also a travelling Children's Theatre, and special one-act plays. It provides talent for the radio and television shows sponsored by the College. All students, whether or not they are enrolled in speech and drama courses, are eligible to try out for any of these activities.

Honorary Societies

Alpha Lambda Delta is a national honor society for freshman women. Membership is determined by grades made in the freshman year. Phi Eta Sigma is the men's counterpart of Alpha Lambda Delta. Membership in these two societies is selective and highly prized by the student body.

Sigma Eta was founded as a society to promote and encourage scholarship. The two highest ranking juniors whose scholarship for their college course meets a certain average are elected to membership. Seniors with a required grade average are also eligible.

Iron Key, a local honor fraternity for junior and senior men, was founded in October, 1919. Membership is determined by scholarship and leadership in student activities.

Kappa Alpha is a local honor society for women, which was also founded in 1919. Membership is determined on the basis of scholarship, student activities, and cooperative spirit. Kappa Alpha seeks to stimulate the interest of college women in constructive educational work and to uphold ideals of college loyalty and personal culture.

Other Activities

Formal dances on or near the campus, informal parties and open houses in the residence halls, weekend ski trips to Wisconsin, sailing on Lake Michigan and a host of other social activities also share the spotlight at Lake Forest. There is some activity available for virtually every student interest. These activities, together with an active search for knowledge, will combine to make your four years at Lake Forest a memorable and worthwhile experience.

HOW TO APPLY FOR ADMISSION

LAKE FOREST COLLEGE believes that the character and personal qualities of a candidate for admission are as important in predicting his academic success and adjustment to college as his academic achievement, as evidenced by his high school record, and his potential for learning, as measured by scholastic aptitude test scores.

Candidates for admission to the freshman class are required to file an application for admission and a $10.00 application fee with the admissions office of the College. In addition the candidate must arrange with the College Entrance Examination Board to take the Scholastic Aptitude Test. This test is administered at test centers throughout the United States and in most foreign countries in December, January, February, March, May and August. Thus no candidate is handicapped in arranging for his admission to Lake Forest.

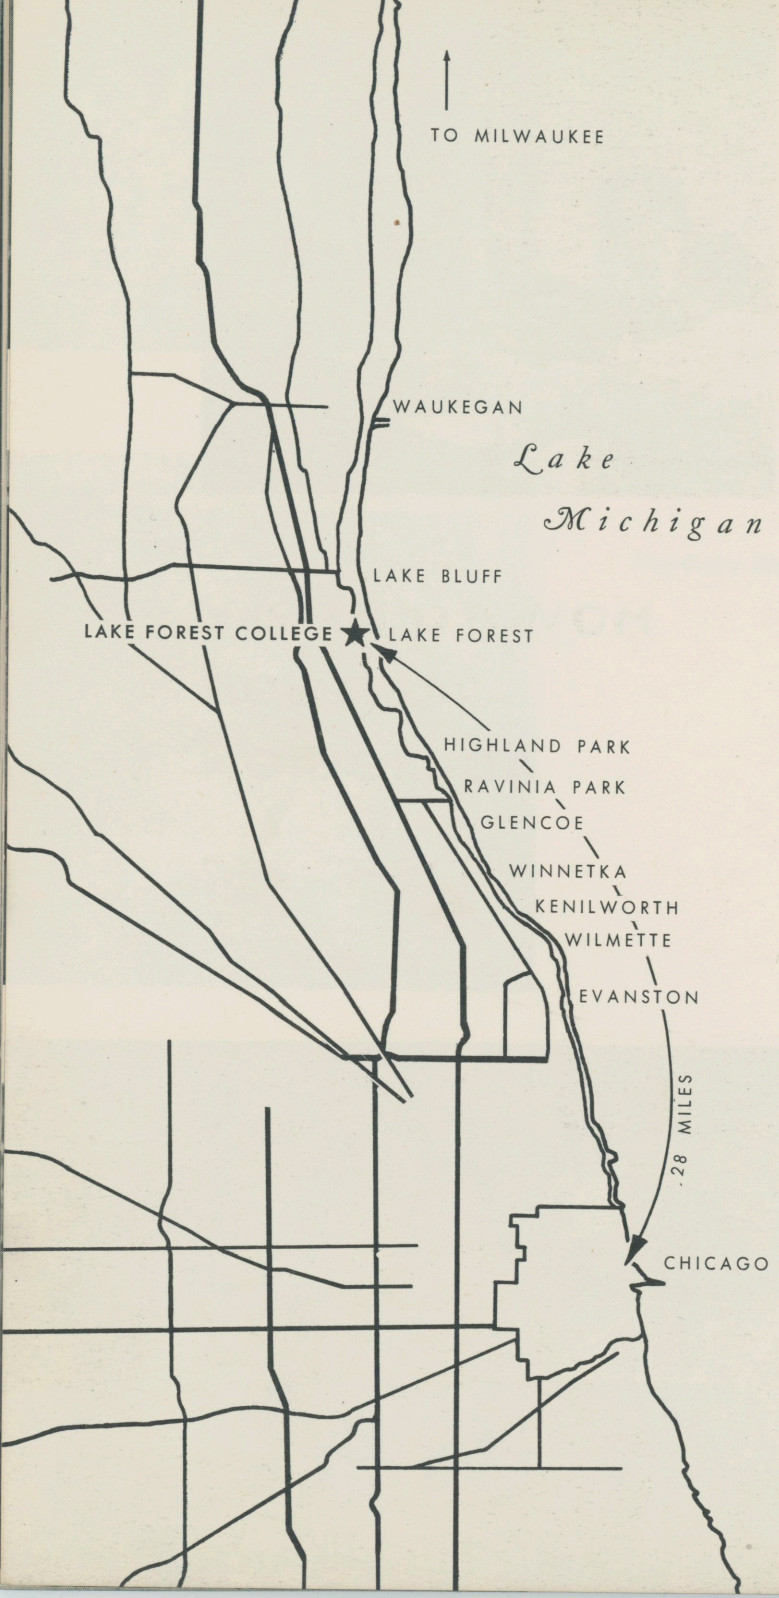
Candidates living east of the Rocky Mountain states arrange to take the test by writing to:

College Entrance Examination Board,
Box 592, Princeton, New Jersey,

Candidates living in or west of the Rocky Mountain states should write to:

College Entrance Examination Board,
Box 27896, Los Angeles 27, California,

A fee of $6.00 is charged for the Scholastic Aptitude Test. Applicants may also be expected to take any other tests in English, foreign languages, sciences, and social studies which may be deemed necessary by the Committee on Admissions.



There are many more candidates for admission than the College can accommodate, so the admissions committee gives preference to early applicants and to those who present the best pre-college records. The high school record, including the course of study followed, the grades made in college preparatory subjects, relative rank in class, and personal recommendations, *as well as* the scores made on the Scholastic Aptitude Test of the College Entrance Examination Board, are all taken into consideration in selecting the candidates who are to be admitted.

The following suggestions are given as a guide to the student who wishes to apply for admission to Lake Forest College:

1. Write to the Director of Admissions, Lake Forest College, Lake Forest, Illinois, stating when you plan to graduate from high school and to enter college. Indicate in your letter what your preferences are for your course of study in college and provide something of your high school background in terms of your academic and extra-curricular achievements. (A catalogue and an application for admission will be sent as well as answers to any specific questions.)
2. Arrange to take the Scholastic Aptitude Test administered by the College Entrance Examination Board as indicated previously. This test should be taken in December, January, February or March.
3. Arrange for a personal visit to the campus, if at all possible, so that you may have an interview with the Director of Admissions and see the College first-hand. You will also have an opportunity to meet members of the student body, faculty, and administrative staff.

IS FINANCIAL AID AVAILABLE?

Opportunities for financial aid are available in the form of scholarships, grants-in-aid, loans and employment.

A special brochure describing financial aid opportunities is available to you by writing to the Office of Admissions, Lake Forest College, Lake Forest, Illinois.

WHAT WILL IT COST?

Lake Forest has adopted a single-fee system that is all-inclusive. This makes it easier for the student and his parents to plan financially for his education.

All students who live on the campus pay $1400.00 per year for their room, meals, tuition. There are no extra charges for the use of library and laboratory facilities, hospitalization insurance, student activities, and linen service. Students must purchase their own books and pay separately for private instruction in music.

All students who commute from their homes pay $700.00 per year for their tuition. Hospitalization insurance is available to non-residents at a minimum cost. Lake Forest has been able to keep its charges at a minimum because of income from its endowment, and because of financial support from the Presbyterian Church, from alumni, friends, business and industry, and foundations.

For further information write to Office of Admissions, Lake Forest College, Lake Forest, Illinois, or return the reply card found in this booklet.

Brief Facts about Lake Forest College Founded 1857

College of Arts and Sciences—Situated along Lake Michigan in beautiful Lake Forest, 28 miles north of Chicago's "Loop"—Metropolitan museums, libraries, theaters, business district easily accessible—Church-related (Presbyterian) but non-sectarian teaching.

Co-educational—Enrollment limited to 1,000—Residence halls for men and women—Average 14 students to each teacher—Full program of student activities, including publications, dramatics, athletics, music, clubs, religious groups.
